

ABSTRACT OF THE DISCLOSURE

**AQUEOUS COMPOSITION COMPRISING A POLYIONIC DENDRITIC  
POLYMER AND AN IONIC SURFACE-ACTIVE AGENT**

5

The invention relates to a composition comprising a single-phase aqueous phase consisting of a system containing: water; a water-dispersible or water-soluble polyionic dendritic polymer (a); at least one ionic  
10 surface active agent (b); and, optionally, a polycationic or polyanionic polymer (c) which is different from the dendritic polymer. The inventive composition can be used for surface treatments, such as on hair or skin, e.g. for hair conditioning.
